Section 13 Dry Run Report

Date: July 2016

Author: Ian Boonin FIA

John Bayliss FIA

# **Contents**

1	Executive summary	5
2	Introduction	11
3	Compliance with scheme regulations	17
4	Consistency between valuations under the scheme regulations	20
5	Solvency	39
6	Long term Cost Efficiency	48

# 1 Executive summary

In connection with the local fund valuations of the Local Government Pension Scheme (LGPS) from 2016, section 13 of the Public Service Pensions Act 2013 requires the Government Actuary to report on whether four main aims are achieved:

- compliance: whether the fund's valuation is in accordance with the scheme regulations
- consistency: whether the fund's valuation has been carried out in a way which is not inconsistent with the other fund valuations within the LGPS
- > solvency: whether the rate of employer contributions is set at an appropriate level to ensure the solvency of the pension fund
- long term cost efficiency: whether the rate of employer contributions is set at an appropriate level to ensure the long-term cost-efficiency of the scheme, so far as relating to the pension fund

We have carried out a "dry run" section 13 analysis based on the 2013 local valuations.

# Compliance

We found no evidence of material non-compliance.

#### Consistency

We found inconsistencies between the valuations in terms of approach taken, assumptions used and disclosures. These inconsistencies make meaningful comparison of local valuation results unnecessarily difficult.

#### Solvency

For the two closed passenger transport funds, we are not aware of any plan in place to ensure solvency. Had this not been a dry run exercise we would have engaged with the administering authorities to discuss the need for plans to be put in place.

A number of amber flags were raised under this heading for the open funds. We may have engaged with some of these administering authorities to discuss the reasons behind these flags. However, none were red-flagged.

### Long term cost efficiency

For the following funds we would have engaged with the administering authority to investigate in more detail whether the aims of section 13 were met:

- > Royal County of Berkshire Pension Fund
- > Somerset County Council Pension Fund

We may also have engaged with some other administering authorities who had a significant combination of amber flags if section 13 had applied as at 31 March 2013.

### **Future analysis**

Based on our on-going experience of reporting under section 13(4) (including this dry run) we may change or add considerations, criteria, tests or metrics to the analysis in the future.

1.1 The Government Actuary has been appointed by the Department of Communities and Local Government to report under section 13 of the Public Service Pensions Act 2013 in connection with the Local Government Pension Scheme ("LGPS" or "the Scheme") in England and Wales. Section 13 provides for a review of LGPS funding valuations and employer contribution rates to check that they are appropriate and requires remedial steps to be taken where scheme managers consider appropriate.

#### Aims of section 13

- 1.2 Section 13 will apply for the first time to the 2016 round of ninety-one separate fund valuations for the LGPS. Specifically, in relation to each fund within the LGPS, section 13 requires the Government Actuary to report on whether four main aims are achieved:
  - compliance: whether the fund's valuation is in accordance with the scheme regulations
  - consistency: whether the fund's valuation has been carried out in a way which is not inconsistent with the other fund valuations within the LGPS
  - solvency: whether the rate of employer contributions is set at an appropriate level to ensure the solvency of the pension fund
  - long term cost efficiency: whether the rate of employer contributions is set at an appropriate level to ensure the long-term cost-efficiency of the scheme, so far as relating to the pension fund

#### Purpose of the dry run

- 1.3 The Department of Communities and Local Government ("DCLG") has asked the Government Actuary's Department ("GAD") to carry out a "dry run" based on the round of LGPS valuations completed as at 31 March 2013 to demonstrate how we may have approached our analysis had section 13 applied to those valuations. This dry run report is designed to help those administering authorities and their actuarial advisors to prepare for the 2016 round of valuations with some knowledge about how GAD might approach reporting under section 13 following the 2016 round of valuations.
- 1.4 Based on our on-going experience of reporting under section 13(4) (including this dry run) we may change or add considerations, criteria, tests or metrics to the analysis in the future.
- 1.5 In this dry run report we make no specific recommendations for remedial steps in relation to solvency and long term cost efficiency, as section 13 did not apply as at 31 March 2013. We do however highlight areas for some specific funds where the aims of section 13 are potentially not being met, and where we may have then sought further information and engagement before recommending remedial steps if section 13 had applied at 31 March 2013.

- 1.6 As part of the dry run analysis, we indicate in this report how the process following production of a draft report under section 13 might have progressed had section 13 applied in terms of engagement with administering authorities prior to finalisation of the report.
- 1.7 In some cases, the data initially provided or disclosed in the valuation report raised additional questions following our initial analysis and concerns raised were allayed following the provision of further information. This serves to highlight the importance of clear disclosure in the valuation reports and accurate provision of data from the local authorities and the actuarial firms.

### Compliance

1.8 We found no evidence of non-compliance with the scheme regulations.

### Consistency

- 1.9 Under the heading of consistency, we have found inconsistencies between the valuations in terms of approach taken, assumptions used and disclosures. These inconsistencies make meaningful comparison of local valuation results unnecessarily difficult.
- 1.10 The primary areas GAD has analysed are:
  - > Common contribution rates
  - > Average actual contributions vs common contribution rate
  - > Assumptions
- 1.11 We have viewed consistency in two ways:
  - > <u>Presentational.</u> Those aspects of the valuations for which we consider there is no particular justification for differences in disclosure between different funds. This includes results disclosures (i.e. presenting the key results in a similar format) and agreeing a common understanding of terms such as the common contribution rate ("CCR"<sup>1</sup>) even if these are not explicitly defined in regulations.
  - <u>Evidential.</u> Those aspects of the valuations that should be consistent except where supported by evidence or local circumstances (e.g. some demographic assumptions). On financial assumptions, we believe that local circumstances may merit different assumptions (e.g. current and future planned investment strategy, different financial circumstances) leading to different levels of prudence adopted. However, in some areas, it appears that the choice of assumptions is highly dependent on the "house view" of the particular firm of actuaries advising the fund, with only limited evidence of allowance for local circumstances.

<sup>&</sup>lt;sup>1</sup> CCR has been replaced by primary and secondary rates in regulation 62.

- 1.12 There is a wide range of reasonable assumptions for uncertain future events, such as the financial assumptions. For the avoidance of doubt, we have not concluded that any of the approaches, taken in isolation, are unreasonable. However the approaches are not consistent with each other, and it is not clearly explained in valuation reports whether the relevant assumptions, and hence differences in those assumptions between funds, are solely driven by local circumstances. Furthermore, there would also seem to be no common understanding of what constitutes "prudence" for the purposes of regulation 58 of the Local Government Pension Scheme Regulations 2013, and its reference to CIPFA guidance.
- 1.13 We are not expecting the immediate prescription of assumptions. Nevertheless readers of the reports might expect there to be consistency, and that transparent comparisons can be made between funds.
- 1.14 We are only able to conclude under section 13(4)(b) of the PSPS Act 2013 Act that 'the valuation has been carried out in a way which is not inconsistent with other valuations', if the valuations are carried out in consistent manner. Currently, in our opinion, the valuations are not carried out consistently.
- 1.15 We appreciate that there are significant challenges to achieving full consistency, particularly in the short term. In the longer term, we would however expect a narrowing of the range of assumptions used, where local experience cannot be used to justify differences.
- 1.16 We are grateful to the SAB Cost Management and Contributions sub-committee and the SAB Secretariat for developing a standard basis and metrics to enable comparisons between funds and we recommend that the valuation results on the SAB standard basis and associated "dashboard" metrics are published in valuation reports to allow readers to make like for like comparisons.
- 1.17 We recommend that the four actuarial firms who advise administering authorities in carrying out funding valuations should seek to agree a standard way of presenting relevant disclosures in their valuation reports to better facilitate comparison.

#### Solvency

- 1.18 Under the heading of solvency, we found that a number of our assessment measures were triggered by the two Passenger Transport funds, West Midlands Integrated Transport Authority Pension Fund and South Yorkshire Passenger Transport Authority Pension Fund. These funds are both closed to new entrants. In particular we might have sought to better understand whether the relevant administering authorities had a plan in place to ensure that the fund continues to meet benefits due in an environment of no future employer contributions being available, if section 13 had applied as at 31 March 2013.
- 1.19 A number of amber flags were raised under solvency for the open funds. Had section 13 applied, we may have engaged with some of these administering authorities, particularly where there was significant combination of amber flags, to discuss reasons behind these flags. However, none were red-flagged. Please see table 5.2 for further detail.

- 1.20 We have also highlighted the ten funds with the lowest funding level on the Scheme Advisory Board's ("SAB") standardised basis. Had section 13 applied, we may have engaged with some of these funds to better understand how they intended to improve their funding position.
- 1.21 We believe it is important that administering authorities and other employers understand the potential cost, so that they can understand the affordability of potential future contribution requirements.
- 1.22 The local valuations and our calculations underlying this dry run report are based on specific sets of assumptions about the future. To help the understanding of the potential for volatility in contributions, we estimate that the aggregate impact on contributions under a financial crisis scenario, similar to the 2008 financial crisis, is an increase in contributions of between £1.7 and £4.9 billion per year (compared with the actual outturn from the 2013 valuations of £6.6 billion).
- 1.23 A more detailed description of the tests and triggers alluded to in the tables below can be found in the relevant sections of this report and are not repeated in this executive summary.

Table 1.1: Funds with a material combination of amber and/or red flags

			SOLVENCY MEASURES						
		RISKS ALREADY PRESENT			EMERGING RISKS				
PENSION FUND	MATURITY (RANK)	SAB FUNDING LEVEL	OPEN FUND	NON- STATUTORY EMPLOYEES	LIABILITY SHOCK	ASSET SHOCK	EMPLOYER DEFAULT		
SOUTH YORKSHIRE PTA <sup>2</sup>	25.2 (1)	114%	NO	100%	+5%	+3%	N/A		
WEST MIDLANDS ITA <sup>1</sup>	25.1 (2)	100%	NO	100%	+5%	+7%	N/A		

## Long term cost efficiency

- 1.24 For the following funds we would have engaged with the administering authority to investigate whether the aims of section 13 were met, had section 13 applied:
  - > Royal County of Berkshire Pension Fund
  - Somerset County Council Pension Fund

\_

<sup>&</sup>lt;sup>2</sup> The *Employer Default* measure is shown as N/A because there are no statutory employers participating in these two closed funds.

Table 1.2: Funds with a material combination of amber and/or red flags

		LONG TERM COST EFFICIENCY MEASURES							
		RELATIVE CONSIDERATIONS			ABSOLUTE CONSIDERATIONS				
PENSION FUND	MATURITY (RANK)	DEFICIT REPAID	DEFICIT PERIOD	REQUIRED RETURN	REPAYMENT SHORTFALL	RETURN SCOPE	DEFICIT EXTENSION	INTEREST COVER	
BERKSHIRE	5.9 (78)	4%	34	6%	-2%	-0.5%	-3	No	
SOMERSET	5.9 (80)	5%	24	6%	-1%	0.0%	0	No	

1.25 A number of other funds have triggered flags. We do not consider that these funds are failing to meet the aims of section 13, but we may have encouraged these other funds to provide further information regarding the relevant measures. Please see table 6.2 for further details.
