## **PROJECT TITLE: St James Parade**

### **PROJECT SUMMARY:**

Capital funding would be used to secure and refurbish a new treatment facility, in addition to an existing facility. This would enable a systems redesign and a targeted approach to supporting and motivating high impact dependent drinkers.

The centres will be configured into an engagement/harm reduction venue (St James Parade) and an active change/maintaining recovery venue (the Beehive), enabling better integration with allied services, and environments more appropriately informed for clients' stages of change.

The changes will enable a 40% increase in alcohol clients.
