

Afternoon Caroline

We have secured funding through the Getting Building Fund which we are using to co-fund the current LGF programme, which you will be aware has a level of structured overprogramming owing to the hard LGF spend end date.

Keynsham High Street was one of the schemes identified to benefit from this new fund and therefore the full committed funding remains in place for delivery by December 2021.

Hopefully this provides the reassurance you require.

Regards

Pete

Good afternoon Pete,

I understand from Andy Rothery that WECA has secured funding through the Getting Building Fund (GBF) which is going to be used to meet LGF over-programming.

This an end date of December 21, and that this can be used to extend the Keynsham High Street project until December as LGF deadline is March 21. As you will know, the start of the project has been delayed due to Covid.

I would be grateful if you could confirm this in an so that we have written confirmation of extension to the funding to feed in to our committee process and so that we can advise Historic England.

Kind regards.

Caroline
