Subject: Re: Foxhill area traffic calming

I would like to make an objection to the proposed traffic calming on hawthorn grove. I am a resident at no 87 and the proposed calming measure is located outside my home. I make objections on three counts, firstly how will the traffic calming measure affect the large amount of traffic heading to the mod site in foxhill, using hawthorn grove as a rat run in rush hour traffic. secondly the noise level of vehicles slowing and accelerating. We already have a bus stop close to our house, so a bus will accelerate, slow, accelerate away every 15 minutes increasing the noise levels. Thirdly, damage and devaluation to my property. I understand from government guidelines that no speed humps of any kind can be located within 25 metres from a bridge, subway or tunnel. so for that reason there must be a threat from structural damage. This coupled with the noise levels, the fact that my driveway is located on the top of it, surely would dramatically decrease the value of my home. I am not opposed to traffic calming measures but there are different ways to combat the problem.

Yours sincerely Paul Dennis
