

Bath & North East Somerset Council		
MEETING/ DECISION MAKER:	Cllr Sarah Warren, Cabinet Member for Climate & Sustainable Travel	
MEETING/ DECISION DATE:	On or after 27 October 2022	EXECUTIVE FORWARD PLAN REFERENCE:
		E 3406
TITLE:	Shortlist for the Mount Road Liveable Neighbourhood Area	
WARD:	Southdown	
AN OPEN PUBLIC ITEM		
<p>List of attachments to this report:</p> <p>Appendix A – AECOM Co-Design Workshop Report 2 (Prioritisation)</p> <p>Appendix B – AECOM Recommendation Report</p>		

1 THE ISSUE

1.1 Executive Forward Plan Reference E3394 delegated the decision to:

- a) agree the proposed shortlists to be taken forward to preliminary design and engagement; and**
- b) following preliminary design and engagement and final design and consultation, implement the shortlisted interventions;**

to the Cabinet Member for Sustainable Transport and Directors of Place Management and Sustainable Communities, in consultation with cabinet members and ward councillors.

2 RECOMMENDATION

The Cabinet member is asked to;

- 2.1 Make a decision to proceed with the shortlist of interventions set out in paragraph 3.8 and 3.9, now taking them forward to preliminary design and engagement
- 2.2 Note that the proposed shortlist is based on work done with communities to first identify their needs and then co-design potential solutions to address those needs, as summarised in Appendix A.
- 2.3 Note that the proposed shortlist was next subject to technical review, both in terms of alignment with the Liveable Neighbourhoods strategy and other factors such as cost, practicalities and timelines, as summarised in Appendix B.

- 2.4 Note that the proposed shortlist was then referenced back to the application put forward by the primary school in Spring 2021 to ensure that the package of interventions satisfied the aims of the original proposal.
- 2.5 Note that the ability to proceed is subject to funding being available for the design, engagement, consultation and implementation work required as a result of this decision.

3 THE REPORT

- 3.1 Residents were first consulted about the Liveable Neighbourhoods Strategy in Autumn 2020. The results of this consultation were taken to Cabinet in December 2020, with applications for a first phase of Liveable Neighbourhood areas subsequently invited in Spring 2021.
- 3.2 48 communities applied to become a Liveable Neighbourhood between February and May 2021. In June 2021, 15 areas were identified as places where a first phase of Liveable Neighbourhoods could start.
- 3.3 A further round of community engagement took place in December 2021. Residents in these areas were asked for some initial feedback on what they thought was good about their local area, what transport-related issues they experienced, and what improvements would make the most impact. The responses helped to identify their needs and the issues to be addressed.
- 3.4 Co-design workshops for all 15 areas then took place between May and July 2022. Residents who had opted to be part of the co-design process or kept informed of the programme (during earlier engagements) were invited to attend. The opportunity was also promoted online and in the community. At the workshops, residents discussed the needs and issues that had been raised by their wider community during the previous engagement. These issues included anti-social driving, speeding, and a lack of safe crossings (among others). Residents then suggested a range of potential solutions to help.
- 3.5 Shortly after the workshops, the attendees were invited back to view the outcomes and to check that their ideas were accurately represented as icons on a map. These maps were displayed at exhibitions for each of the 15 areas between August and September 2022. At the exhibitions (and via email) the workshop attendees, plus those that asked to be kept involved in the programme, were asked to review the longlist of potential solutions that had been put forward for the original application area. They were also asked to prioritise the measures that would most benefit their communities. The invitation was also extended to their friends and family. Their feedback is presented in Appendix A.
- 3.6 The measures prioritised by residents were then subject to technical review by the project team, both in terms of alignment with the Liveable Neighbourhoods strategy and other factors such as cost, practicalities and timelines. This outcome of this review is presented in Appendix B.
- 3.7 The project team then referenced the summary list of potential interventions in Appendix B back to the original application put forward by the primary school in Spring 2021 which sought to address the following key issues along Mount Road and outside the school:

- a) **Road safety on the journey to school for pedestrians and cyclists;**
- b) **Parking behaviour, including cars parking on pavements outside or near the school and cars parking on junctions which reduces visibility for pedestrians and cyclists;**
- c) **The speed at which vehicles travel along Mount Road; and**
- d) **Narrow pavements.**

3.8 Using these objectives as a basis, the following shortlist has been developed:

- a) **Controlled crossing in the Roundhill Grove junction area; and**
- b) **Mini-roundabout (improvements) along Mount Road.**

3.9 In addition, the ward councillors have requested that the following interventions are brought forward into the shortlist to address parking behaviour and speeding, and improve pedestrian and cycle safety:

- a) **Speed cushions along Mount Road and outside the primary school;**
- b) **Continuous crossings along the side roads which meet Mount Road, supported by narrowing the side road junctions;**
- c) **Widening the western footway to the southern end of Mount Road, and around the existing bus stops; and**
- d) **Extend the school 'Keep clear' zig zags and double yellow lines outside the primary school.**

3.10 With reference to 3.8(a) it is proposed to provide a raised zebra crossing between Mount Grove and Roundhill Grove.

3.11 With reference to 3.9(a), raised pedestrian crossing points across Mount Road are proposed in lieu of speed cushions.

3.12 It is recognised that during design development there will be a need to coordinate with the proposed removal of parking restrictions on the western side of Mount Road in the Mount Grove area.

3.13 Where an intervention is marked as 'integrated into other programmes' in Appendix B, it will not be taken forward as part of this programme but will be shared with other council departments, the police, ward/parish councils and community groups for adding into their programmes. Examples include hedge, footway and carriageway maintenance, parking and speed enforcement, electric bike hire, EV charging points and car club provision.

3.14 The report in Appendix B also sets out where statutory consultation is not required due to the nature of the proposed intervention, or where implementation could potentially proceed under an ETRO, or 21-day Notice. An ETRO will allow people to have their say while experiencing the measure as a trial for minimum of six months. Installing a measure with 21-Day Notice will allow people to comment for 21 days before the measure is permanently installed (see also section 4).

- 3.15 The next step is to progress the design development work. This may result in further changes to the shortlist. For example, a new footpath may involve obtaining rights across land owned by others that the landowner is unwilling to provide. In addition, some interventions may be discontinued in favour of other interventions in the shortlist or combined. The nature of the interventions may also change as feedback is received from residents and others when the project team engage and consult the wider public on the interventions.
- 3.16 Where appropriate, interventions will be monitored and evaluated, with baseline data obtained in advance of their implementation. Traffic monitoring will be carried out before and during implementation to understand how traffic adapts to the proposed interventions and to evaluate any impact on the network.

4 STATUTORY CONSIDERATIONS

- 4.1 Due to the nature of the proposed interventions statutory consultation may not be required, or implementation could proceed under an ETRO or 21-Day Notice.
- 4.2 An ETRO can be implemented seven days after the Notice of Making is published. The process allows consultation to be undertaken while the scheme is trialled, allowing further feedback and objections to be collected while the pilot is in place. Once an ETRO comes into force, there is a six-month period in which objections can be made. If the ETRO is subsequently modified, objections can be made in this period starting from the date of the changes. The decision to remove the ETRO or make the intervention permanent must be made within 18 months of initial implementation. If the ETRO is to be made permanent, a TRO notice will then need to be made.
- 4.3 A public inquiry could be required, depending on the nature of the objection, if it is received within the first six months of making the ETRO and not withdrawn, and the authority intends to make the order permanent without any modifications to address it. Making modifications or the withdrawal of the objection following correspondence with the objector will remove the need for an inquiry.

5 RESOURCE IMPLICATIONS (FINANCE, PROPERTY, PEOPLE)

- 5.1 The funding allocated to implement the Liveable Neighbourhoods programme and associated Resident's Parking Zone improvements comprises:
- £6m allocation secured through the City Region Sustainable Transport Settlement, of which WECA Grant is £5m and £1m is match funding required from B&NES to meet it's 20% minimum requirement for local contribution.
 - The £1m match funding is to come from £2.2m supported borrowing allocation confirmed in the Council's Capital Programme in February 2022 budget setting,
 - Total funding approved to date is £3.2m, which includes further funding of £800K from the Council's Strategic Transport Infrastructure CIL allocation and £220K from the Council's Project Initiation Fund. These last two sources will be restored on receipt of WECA Grant and future borrowing funded by Resident Parking Zone income.
- 5.2 The total funding allocated is sufficient to complete the design of all the shortlisted interventions across the 15 areas in the LN programme and to deliver the three

LN pilots and seven Resident's Parking Zones. WECA will fund £440K towards scheme development and design and then once the Full Business Case (FBC) is submitted and approved release £4.56m of CRSTS grant to deliver across the project. The FBC will also determine the extent to which costs incurred to date will be eligible as match funding.

6 RISK MANAGEMENT

- 6.1 A risk assessment related to the issue and recommendations has been undertaken, in compliance with the Council's decision-making risk management guidance. The risk register is reviewed at the monthly project board meetings.
- 6.2 Where a 'fast track' item has been assessed as non-contentious or already well supported, and either statutory consultation is not required due to the nature of the proposed intervention, or implementation could proceed under an ETRO or 21-Day Notice (see also section 4).
- 6.3 The aim is that 'fast track' interventions will proceed straight through preliminary and final design to implementation without the usual informal engagement step at the preliminary design stage. This is legally acceptable and allows us to implement measures quickly that improve residents' health, safety, and wellbeing (as outlined in the Liveable Neighbourhoods strategy). That said, there are significant benefits to engaging the wider public on the preliminary designs. This includes the opportunity to talk to people about the wider aims of the programme, why it is needed, how the interventions were brought forward, and potential behaviour changes that residents may be able to make to improve their neighbourhoods.

7 EQUALITIES

- 7.1 Equalities impacts are assessed both at a programme level and from the preliminary design stage, as part of the individual scheme design process.
- 7.2 A programme level joint equalities impact assessment has been developed for the Liveable Neighbourhoods and Resident's Parking Zone programmes. This was published in January 2022 and is under regular review.

8 CLIMATE CHANGE

- 8.1 A Climate Emergency was declared in March 2019 along with an Ecological Emergency in July 2019. In response to this B&NES has pledged to achieve carbon neutrality by 2030. Liveable Neighbourhoods are part of a package of measures to mitigate the climate crisis through the adoption of more sustainable and healthy transport options.

9 OTHER OPTIONS CONSIDERED

- 9.1 None.

10 CONSULTATION

- 10.1 The consultation, engagement and co-design undertaken to date is set out in section 3. There will be further engagement and consultation on the proposed shortlist, either in advance on the designs, or as part of an ETRO or 21-Day Notice. A wide public engagement is planned for Winter 2022/3.

10.2 In line with paragraph 1.1, consultation has been undertaken with the Directors of Sustainable Communities and Place Management, together with cabinet members and ward councillors.

10.3 This report has also been agreed by the S151 Officer and Monitoring Officer.
