

# **CQC Inspection of ICBs**

4th of December 2023

# **Context**

- For integrated care systems, CQC will start to form a national view of performance, initially focused on themes:
- ➤ Equity in access is the first theme
- This would show whether systems are working together to support people to access the care, support and treatment they need when they need it. It includes how we are responding to inequalities of access across our population. Their findings will inform CQCs annual 'State of Care' publication.
- Pilots are taking place in Dorset and Birmingham ICBs to test the approach before starting formal assessments.
- CQC are working closely with the Department of Health and Social Care on how they will deliver further assessments beyond this point.

# There are three main reasons for the change:

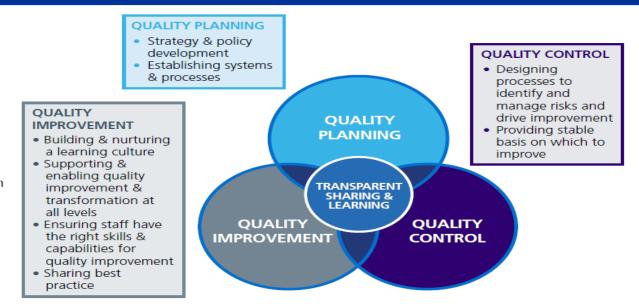

- To make things simpler so CQC can focus on what really matters to people.
- CQC to better reflect how care is actually delivered by different types of service as well as across a local area.
- To have one framework that connects their registration activity to their assessments of quality.

Judgements will be more structured and consistent, CQC have developed six categories for the evidence they collect:

- people's experiences
- feedback from staff and leaders
- observations of care
- feedback from partners
- processes
- outcomes of care.

## Delivering quality care in systems: the Juran trilogy

## Delivering quality care in systems: key principles

#### 1: A shared commitment to quality

Partners have a single understanding of quality, which is shared across all services. Partners work together to deliver shared quality improvement priorities and have collective ownership and management of quality challenges.

#### 2: Population-focused

Clear quality improvement priorities are based on a sound understanding of quality issues within the context of the local population's needs, variation and inequalities.

## 3: Co-production with people using services, the public and staff

Meaningful engagement ensures that people using services, the public and staff shape how services are designed, delivered and

#### 4: Clear and transparent decision-making

Partners work together in an open way with clear accountabilities for quality decisions, including ownership and management of risks, particularly what happens when serious quality issues arise.

#### 5: Timely and transparent information-sharing

Partners share data and intelligence across the system in a transparent and timely way.

#### 6: Subsidiarity

Management of quality largely takes place locally, but is done at scale where needed to improve the health and wellbeing for the local population.

## A shared single view of Quality

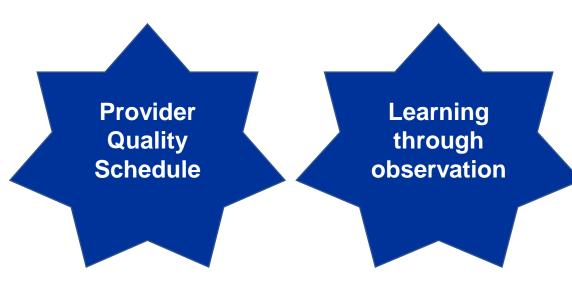

# Delivering quality care in systems: The 7 steps

# **Quality Insight**

Internal	External
Quantitative	Quantitative
<ul> <li>Serious Incidents data and National Patient Safety Alert data</li> </ul>	CQC inspection ratings data
<ul> <li>Infection prevention and control data including HCAIs</li> </ul>	Quality data in the System Oversight Framework (SOF)
Hospital mortality data	Quality data in the GP Quality and Outcomes
<ul> <li>Freedom to Speak Up (FTSU) data</li> </ul>	Framework (QOF)
<ul> <li>Integration Index (forthcoming 2022/23)</li> </ul>	External Audit data
Staff Survey results data	External benchmarking data
Workforce data - absence rates and turnover rates	Clinical Audits data
Quality Accounts data	NHS Digital data/intelligence on quality
Maternity reporting tool data on quality	UK Health Security Agency (UKHSA)     data/intelligence
<ul> <li>Quality data in Model Health System and the Quality Toolkit</li> </ul>	External horizon scanning data
Adult and child safeguarding	<ul> <li>Homicides/unlawful killings – historic and ongoing</li> </ul>
Local Authority data (eg ASCOF)	including action plans • National surveys data - CQC patient surveys, HEE
Charity/voluntary organisation data	training surveys, GMC National Training Survey, GP patient survey (GPPS)
<ul> <li>Quality data in the Commissioning for Quality and Innovation (CQUIN) Framework</li> </ul>	Public Health Outcomes Framework
<ul> <li>Workforce Race Equality Standard (WRES) data</li> </ul>	Friends and Family Test
Qualitative	Qualitative
Complaints, PALS and concerns data	<ul> <li>CQC Inspection reports, warning notices, related notifications</li> </ul>
<ul> <li>Quality Accounts information</li> </ul>	HSCRF emerging concerns protocol
Speaking up reports from staff	<ul> <li>HEE intensive support framework and Deanery reports</li> </ul>
<ul> <li>Serious Incident investigations and action plans</li> </ul>	<ul> <li>Professional regulators intelligence</li> </ul>
<ul> <li>Internal Audit reports and action plans</li> </ul>	<ul> <li>Oversight and Scrutiny Committees, Health and Wellbeing Boards</li> </ul>
<ul> <li>Internal reviews (lessons learned, peer reviews, thematic), recommendations and action plans</li> </ul>	Central Alerting System (CAS) safety alerts
System Quality Groups/Quality Committees     Staff feedback/survey information	Patient/service user websites, groups and forums     Traditional media and social media
Mandatory and statutory training records	Getting It Right First Time (GIRFT) and RightCare reports
<ul> <li>Staff professional development plans (PDPs)</li> </ul>	Regulation 28 Prevention of Future Death reports
<ul> <li>Maintaining High Professional Standards (MHPS)</li> </ul>	Judicial review reports
Risk and issues registers	Safeguarding serious case reviews
Contractual and legal action	Charity Commission case reviews/reports
<ul> <li>Quality impact assessments</li> </ul>	Use of NICE Quality Standards

'Insight' work aims to improve understanding of safety across the whole system by drawing intelligence from multiple sources of patient safety information.

# Assurance- good practice (Good Governance Institute)

# The right amount of assurance

- more is not necessarily better.
- Ensuring balance between assurance and reassurance.
- Assurance is more than metrics- metrics are just one of the forms of assurance a board can receive. Action plans, strategy updates, service users' feedback and deep dive presentations are all forms of assurance and help determine whether controls for strategic risk is working.
- Assurance should be additive, not duplicative, with providers monitoring and improving performance, Place providing assurance on point of intersection and system assurance focused on system-level outcomes and improvements.

## **Triple A Approach**

### **Alert**

 To escalate any issues that require board discussion or action. There is no requirement to put anything in the alert section unless the committee absolutely needs to escalate a risk or issue. Please state 'none' rather than leaving the section blank.

### **Advise**

 To highlight an issue that may require further monitoring by the committee over a period.

#### **Assure**

• To provide positive news on performance, best practice or to celebrate successes/ awards.

# Risk response and escalation (National Quality Board)

Risk response and escalation and the three levels of quality assurance and support

Routine quality assurance and improvement

ICB / place with providers - within providers and across pathways, responding to risks and supporting improvement Enhanced quality assurance and improvement

ICB / place, with
NHSE Region
support as
required –
to respond to system
risks and support
improvement

Intensive quality assurance and improvement

NHSE and regulators to respond to very serious/ complex/ recurrent risks and concerns

Learning and improvement

- The move into enhanced assurance for health commissioned providers will be authorised by the ICB
- The move into intensive assurance by NHSE.
- Decision must reflect the risk profile and regulatory and accountability arrangements.
- Role of System Quality Groups will be integral to decision making as they provide joined up quality intelligence and engagement, enable improvement and support to system risks.
- Where there is an emerging risk that is deemed to be a significant or immediate risk to quality, including safety, which is not being addressed in wider discussions and the need to rapidly share intelligence, diagnose, profile risks, and develop action/improvement plans, the ICB or other key partners such as NHSE, regulators or Local Authorities will instigate Rapid Quality Review meetings
  - including the development of an Improvement plan and if required
    - additional Quality Improvement Groups to ensure the required actions are taken forward and improvements realised.
