Your pension, your future

Avon PF has more members than the average LGPS – but it is not a mega LGPS fund

Admin costs per member are related to scheme size – Avon costs of £32 are on the ‘cost line’ and less than the LGPS average

2023/24 Admin Costs per Member vs Scheme Member

Avon is 'cost average' as the bulk of cost drivers are broadly near the middle of the LGPS range

Avon ratios near the middle of LGPS range

- ✓ New retirement as % of total membership:
 - new retirements typically require personal intervention
 - they can be complex to administer.
- ✓ Members still contributing:
 - drives costs more than retired members.
 - cost drivers include job moves, employer changes, contribution changes, annual benefit statements, etc.
 - many of the above are not required for retirees.

Avon ratios more demanding than LGPS average

- ✗ Members per employer
 - Avon has more employers per member than LGPS i.e. there is a lower member per employer ratio.
 - this leads to higher unit costs as each additional employer drives new fixed costs.

Avon's new retirements are broadly in line with LGPS average

Avon members still contributing broadly in line with LGPS average

Contributing Members – % total fund membership

Though Avon's members per employer are materially below LGPS average – potentially driving higher costs

LGPS Funds - England & Wales
members per employer

Avon's investment costs are lower than the LGPS average – probably driven by higher passive equity weightings
