Adult Social Care Improvement Plan Update

Cabinet

13th November 2025

Bath & North East Somerset Council

Improvement Priority 1.1:

Improve public access to information, advice, guidance, and enhance our prevention services.

CQC Theme 1: How the Local Authority works with people	Conduct a thorough diagnostic assessment to ascertain our current provision of Information, Advice, and Guidance (IAG), as well as the methodologies employed by our partners.	A full diagnostic report will outline where there are shortfalls and make recommendations on how to remedy them. The recommendations will be drawn up into a Project and the work will be managed through the project. Evidence of the impact of the
Improvement Priority 1.1: Improve public access to information, advice, guidance, and enhance our prevention services.	Identify existing gaps, evaluate the scope and urgency of the required work, and subsequently formulate a comprehensive project plan that outlines necessary actions to achieve the desired outcomes. Highlight areas of work where co-production and co-design would benefit service users and the council.	work might be evidenced through customer satisfaction surveys, website analytics and feedback, call logs, social media engagement
Progress update	In May 2025 Adult Social Care (ASC) set out to complete a diagnostic assessment of its Information, Advice, and Guidance provision. The Local Government Association diagnostic tool was used to structure the work needed. Consultations were held with several key teams, including the Web Team, Directory Team, Customer Service Team, and Operational Staff. Simultaneously, engagement with external partners, such as Third Sector organisations and Social Prescribers, has also taken place through the use of questionnaires and a resident questionnaire was undertaken in collaboration with Healthwatch. The diagnostic assessment of the adult social care information and advice offer is now complete. This has produced a scoring matrix and identified specific core areas for development. Four recommendations have been made to the management team, following the diagnostic. A plan of work will be developed by Corporate Colleagues with ASC and Healthwatch input, this is part of the council's transformation programme, which will begin in 2026.	

Improvement Priority 1.2:

Reduce waiting times for all services areas ensuring that people are prioritised according to risk

CQC Theme 1: How the Local Authority works with people Improvement Priority 1.2: Reduce waiting times for all services areas ensuring that people are prioritised according to risk	A single triage and prioritisation system will be in place, so people are allocated based on the level of risk. A training program is underway to broaden the Best Interests Assessors (BIA) staff resource, enabling the wider staff group to become BIAs. Establishing a shared manager rota to approve BIA assessments to reduce wait times for Deprivation of Liberty Team waiting lists. Conducting an OT diagnostic exercise over a 3-month period to identify potential new processes. Implementing a waiting list backlog project while simultaneously developing a new OT clinic for in-person consultations.	The impact of this work will be measured using Power BI, specifically tracking the reduction in waiting lists in operational team and in the length of time from referral to assessment. Feedback from individuals who underwent an assessment indicated that it was conducted in a timely manner, as identified through audits. Applying interventions will give us assurance of active risk management and will see Risk Registers amended as our interventions take effect.
Progress update	Care Act Assessments In January 2025 201 individuals were waiting for allocation for a Care Act Assessment. In September 2025 this has reduced to 65 people waiting for allocation for a Care Act Assessment. Action plans on those with longest waits are discussed at the fortnightly operational performance meetings. People waiting for an assessment are supported to access information, advice and guidance at the point of contact to ASC. All referrals are given a priority rating based on the level of risk and each team has a 'duty worker' to respond to any questions or concerns. All referrals awaiting allocation are monitored daily. Mental Capacity Act/ Deprivation on Liberty Safeguards The number of people awaiting a Deprivation of Liberty (DoLs) authorisation has also decreased with a reduction from 509 in January 2025 to 445 in September 2025. Occupational Therapy The Occupational Therapy The Occupational Therapy (OT) waiting list has reduced from 229 in January 2025 to 45 in September 2025. Add in the external agency and assessment centre Reviews In January 2025 71% of people who require an annual review, have had their review within the 1 year timescale. In September 2025 this has increased to 74%. Financial Assessments 124 assessments in process Of which 121 are still awaiting returned information and 3 have information returned and in the process of being reviewed. 41 cases exceeding 28 days 7 cases exceeding 84 days, of which 3 are deputyship applications. 3 cases exceeding 6 months all are deputyship applications underway.	

Improvement Priority 1.3:

Implement a practice model that will support our staff to deliver an equitable and legally compliant offer to people who are in contact with adult social care

CQC Theme 1: How the Local Authority works with people Improvement Priority 1.3: Implement a practice model that will support our staff to deliver an equitable and legally compliant offer to people who are in contact with adult social care	Implement our Practice Standards and evaluate. Establishing a Practice Development Group to coproduce a practice model with our staff and partners. Staff collaboration with the Principal Adult Social Worker to identify training needs, share insights from audits and complaints, and promote best practices in outcome-focused work and documentation.	The work of the Practice Development group will be documented through minutes of the discussions and a summary of the actions to be carried out. Application of the Care Act and equity in access to services will be identified through audits and the Practice Forum. An increase in the uptake of training is expected and will be evidenced by the Learning and Development Team. Although our current Direct Payment uptake is low compared to national figures, it is part of our core offer, and corresponding policies and procedures will evidence the progress made to make Direct Payments accessible.
Progress update	Since the Principal Adult Social Worker (PSW) was appointed, the new Practice Framework and Practice Standards have been with practitioners. The Practice Framework and Standards provide a structured approach for guiding professional practice, enand promoting continuous improvement. The PSW will launch the Practice Framework and Standards now the Adult Social Carestructure is complete. The PSW has also established a Practice Development Group that meets on a bimonthly basis. Set up in April 2025, attendant Practice Development Group is good and these continue to run with the next one scheduled for early November. The PSW has collaborated with the Organisational Development Team to assess the training opportunities available from Rese Practice for Adults- an organisation that supports professionals in health and social care, through developing evidence-informed and learning opportunities. This is to focus on increasing knowledge of Care Act 2014 eligibility The process for the recruitment of a new Direct Payment (DP) Lead was carried out and the DP Lead commenced working for September 2025. Now in post, the DP Lead has begun assessing our current offer, reviewing policies/ procedures and formula plan.	
	Since being in post, a 'Direct Payment Café' has been set up and is scho information, advice and guidance when working with individuals with an	

meet assessed eligible needs. The first session took place on 22nd October with six attendees.

Improvement Priority 2.1

Work collaboratively with practitioners and partners to ensure we commission services that meet the needs of our population to ensure diversity and sufficiency in the local market

The Strategic Commissioning Hub's Quality Assurance Team will be Theme 2: Providing Evidence of our work with providers will be through the completion responsible for reviewing the Commissioning Quality Assurance of Quality Assurance visits and corresponding documentation; Support Framework and amending as necessary to ensure we capture however, where a provider's CQC rating changes, this will be Improvement Priority 2.1 information about how we support providers to maintain or increase the outside the council's control. Minutes from meetings with frontline Work collaboratively with CQC rating. This will also include sharing of information and learning in practitioners will evidence engagement and discussion about the practitioners and partners to Provider Forums. Alongside this, we will work with the Practice needs of the local population and will pave the way for new ensure we commission Development group to determine the best way of engaging with staff to market initiatives that the Commissioning Team will take forward. services that meet the needs understand the needs of the people they work with to develop the of our population to ensure market accordingly; enabling us to support more people in B&NES. Feedback from providers will demonstrate the support we offer diversity and sufficiency in them, and they will be knowledgeable about the local Forum's the local market they can attend for support. A new Quality Assurance Review Document has been developed and was piloted during September. Following the pilot, this is being Progress update reviewed again to incorporate services for children, enabling an all-age approach to quality assurance. Fortnightly feedback and collaboration conversations between commissioners and practitioners, have been implemented, enabling a mix of thematic and open conversations. The new Professional Feeback Form launched in June 2025, continues to be used by practitioners, enabling information sharing and good communication between services. The Communication strategy for the Community Support procurement has been updated, providing good dialogue with providers through Provider Forums. Alongside this, our Commissioning Equality Diversity and Inclusion requirements for service providers is being updated and aligned to the review of the Health Inequalities work and development of the Neighbourhood Health approach. All the work completed over the last five months has enhanced the visibility of channels for collaboration and communication for Commissioning, among providers, service users, and professionals can facilitate new avenues for access beyond a single process, resulting

in more resilient and robust support structures.

Improvement Priority 2.2

Introduce more innovative ways of supporting people, staff and stakeholders, through the use technology and digital solutions.

Theme 2: Providing	The Technology Enabled Care Strategy has been developed over the last 12 months. Significant work has been done to understand different	Once the Technology Enabled Care (TEC) and Digital programme is complete and delivered into business as usual, it will enable
Improvement Priority 2.2 Introduce more innovative ways of supporting people, staff and stakeholders, through the use technology and digital solutions.	models and assess readiness for innovative ways of working. The strategy is now ready to be turned into a Programme of work, clearly defining the necessary tasks and involving the right staff and stakeholders to develop a service that meets the needs of the population. The B&NES Safeguarding Adults Portal went live in November 2023, and there are plans to expand online portals to promote equity in experience.	reports on the number of people receiving TEC or digital solutions to meet their needs. This will include the impact on local services, such as smaller homecare packages required, and the impact on individuals achieving outcomes important to them. People's feedback and the consideration of TEC or digital solutions will be evidenced through practice audits and discussions at Practice Forum. Additionally, people who use a digital platform to access an assessment will be asked about their experience via an online feedback form.
Progress update	Magic Notes has been fully implemented across Social Care operational teams, with 160 staff now trained and using the tool. In addition to this, a trial is being conducted in the Commissioning Quality Assurance team. Engagement is underway with residents and staff for the development of the digital and tech strategy. B&NES has partnered with Healthwatch to gather feedback from residents, with a particular focus on engaging marginalised communities. ASC Commissioning are leading on workshops with staff groups including managers and frontline workers across the directorate. All information will be written into a final strategy and activity plan. Due to the volume and pace of change happening across the directorate currently, ASC has been prioritising tactical aspects of the digital programme, based on these aspects having the biggest impact on staff and residents and lead to better outcomes more immediately. Examples of this include the roll out of Co-Pilot and Magic Notes, as well as supporting the analogue to digital switch over and resident surveys. ASC will further improve the more strategic TEC offer as this progresses.	
	There is now a dedicated Adults Systems Expert & Service Lead respon practitioners. Over the last four months, the Adults Systems Expert and sprocesses and referral routes via the Adult Social Care Portal. Documen Operational Team Restructure. The system restructure has been tested	Service Lead has developed new Liquidlogic Adult's system station has been built to prepare for the implementation of the ASC
	Additional forms on the adult social care portal include professional acce	ess team referral form, public access team referral form, OT

process, ability to self-serve, easier accessibility and faster support.

professional referral form and public OT referral form. This benefits individuals due to centralized access to information, streamlined

Improvement Priority 2.3

Giving residents a bigger say in local services and develop how we gather feedback on people's experience of Adult Social Care

Theme 2: Providing Support	We will develop and implement a system that allows all individuals to provide feedback in a manner that meets their access needs.	We will use various methods to gather feedback, including written guidance from the Principal Adult Social Worker and minutes from resident groups. Our aim is to show that we adapt services based
Improvement Priority 2.3 Giving residents a bigger say in local services and develop how we gather feedback on people's experience of Adult Social Care	Determine the most appropriate ways to communicate to staff and individuals how the learning from the feedback has been implemented. Create more opportunities for residents to participate in the planning and development of local services through collaborative design, planning, and evaluation.	on individual needs. Feedback will measure our performance and highlight areas for improvement.
Progress update	 A Co-Production Plan for 2025-26 has been agreed and is embedded act meetings have continued to take place monthly since February 2024, with production include: Involving people in strategic reviews, such as the family's involved. Carers have also been involved in the specification and question part of the tender evaluation panel. Further to this, the ASC Partners in Care and Health Improvement Advist Excellence (SCIE), to discuss how they can support ASC to review the cwill be held with SCIE in early October to scope the approach to this work. As part of the ASC Restructure, a new post of 'Service User Development focus will be on developing and implementing a system that allows all incomplete that directorate. The Principal Adult Social Worker (PSW) developed and implemented a far, 90.4% rated their experience as positive. The PSW and Director of A practice audits. Feedback on people's experiences of ASC is shared at the quarterly. 	ement in reviewing B&NES's respite offer a setting process for our carers support service tender, and form sor has facilitated a meeting with the Social Care Institute for current co production offer, activity and practice. A Planning meeting k with a view to starting this in November. Int and Engagement Lead' was created and will start in October. The dividuals to provide feedback and how this is shared with staff within new audit tool in February 2025. From 21 responses received so adult Social Services (DASS) also meet regularly to carry out

Improvement Priority 3.1:

Ensure our governance and risk management processes are used consistently to ensure safeguarding procedures are followed in accordance with making safeguarding personal principles

Theme 3: How the Local
Authority ensures safety
within the system

Improvement Priority 3.1:

Ensure our governance and risk management processes are used consistently to ensure safeguarding procedures are followed in accordance with making safeguarding personal principles

A safeguarding action plan is established to manage risk, detailing required steps. Some actions are currently in progress, while others will commence shortly based on urgency. The LAS and Controcc Development Group holds monthly meetings and has initiated discussions on a risk assessment tool. These efforts are ongoing and incorporated into the LAS Development Lead's Workplan.

Progress in this area will be indicated by various reporting methods. Compliance with MSP principles will be verified through the BCSSP annual audit and safeguarding audits, with data recorded on LAS and reported via the BI dashboard. Risk assessment creation on LAS and monitoring through governance structures like supervision and Practice Forum will demonstrate our advancement. Supervision notes and team meeting minutes will provide evidence of staff support in learning how to evaluate, reduce, and manage risk.

Progress update

ASC has made significant amendments to the documentation used to record safeguarding enquiry outcomes. These changes enable us to record whether the principles of Making Safeguarding Personal (MSP) have been adhered to and also allow for performance reporting on this. This is a big step forward in ensuring our safeguarding practices are both effective and transparent.

In collaboration with Bath University, ASC has been conducting research to gain insights into the MSP experience of adults with a Learning Disability (LD) throughout their safeguarding journey. This research also gathers experiences from practitioners delivering safeguarding services, identifying any barriers or successes in MSP. The findings from this research will be invaluable in informing our future support offerings. The research has already been approved by both the university and council ethics boards, with staff sessions initiated in July and sessions for adults with LD launched in September.

Additionally, we have developed a new Safeguarding Pathway in preparation for the ASC Operational restructure set for October 2025. To enhance our risk management capabilities, a new risk screening tool and RAG rating system have been developed within LAS (the system used to record ASC activity). This new system provides greater visibility for managers, serving as an effective reporting mechanism.

In our continuous effort to learn and improve, we are now sharing learning outcomes from events such as Safeguarding Adult Reviews and Ombudsman rulings at fortnightly staff briefings. This ensures that we can collectively take forward these lessons into our practice. ASC has also reviewed the mandatory training requirements for staff working with safeguarding, which will be available both internally and through the B&NES Community Safety and Safeguarding Partnership (BCSSP).

We are currently exploring ways to introduce TEC through pilots, in order to get TEC back onto the anticipated trajectory, however this work needs to be done in the context of the rest of the changes being bought about by the Improvement Plan, embedding a new Operational Restructure, a SCIE review into our Co-production offer and the scheduled PCH Safeguarding Peer Review.

Improvement Priority 3.2:

Refresh and implement a new pathway for people transitioning from children's services to adult services.

Theme 3: How the Local Authority ensures safety within the system Improvement Priority 3.2: Refresh and implement a new pathway for people transitioning from children's services to adult services.	A public and professional portal will be developed for referrals for any young person or young carer with an appearance of care and support needs to be referred to ASC. Regular meetings will take place with ASC and the parent carer forum. Live well B&NES and the public facing website will be updated to reflect the ASC transitions offer. A dedicated ASC transitions team will be recruited. ASC will form part of the multi-agency PFA group. There will be PFA strategy developed this will include clarity of the agency roles and responsibilities. This will link to work commenced on PFA pathways and transition policy which has been started but not concluded.	Referrals for young people are received and prioritised for ASC assessments. Parents and carers can access advice and information on ASC in various formats. Referrals and waiting times will be built into our new BI dashboards. This will include looking at the timeliness of referrals, the offer to young people and the experience of people on the pathway.
Progress update	The new Transitions Portal, which enables parent carers, young people and professionals to refer to ASC was launched in November 2024. The Preparing for Adulthood offer is a joint programme with Children's, Education and Adults. The Project is progressing, and workshops have been held to map current systems, processes and the different interactions between teams, the young people accessing the service and their families.	

Improvement Priority 4.1:

Improve the quality of our data to ensure better oversight of individuals journeys through the use of the performance BI dashboard

Theme 4: Leadership

Improvement Priority 4.1: Improve the quality of our data to ensure better oversight of individuals journeys through the use of the performance BI dashboard

We are committed to enhancing staff training to ensure accurate and timely information processing on LAS. We aim to clearly outline the current data and performance information we capture, as well as our future data and performance information requirements.

We will conduct a diagnostic assessment to understand staff's current level of understanding regarding the data we collect and the reasons behind it.

Our goal is to identify and address staff training needs to ensure effective use of BI Dashboards for performance understanding and improvement.

We will ensure that the data resulting from LAS changes is prominently featured on the BI dashboard.

To measure the impact of these actions, we will implement several key evaluation methods. The Quality Assurance Board will us the BI Dashboards to provide a clear indication of how we are performing against our key performance indicators both national and local.

Our case audit process will demonstrate areas of good recording practice and areas for improvement. Staff representatives are involved in LAS system and workflow changes from testing to implementation.

Reports to the Quality Assurance Board that highlight trends in waiting lists and productivity will serve as another crucial metric. These reports will help us understand the broader organisational impact of our initiatives.

Progress update

The Adults Systems Expert & Service Lead has held 3 Data Quality Workshops with managers across the directorate, focusing on the use of the Business Intelligence dashboards, to ensure understanding of the benefits of using data available as part of the management of caseloads and demand

ASC has been working collaboratively with the Business Intelligence (BI) Team to define a comprehensive suite of data reporting requirements. In addition to this, both teams have been working to define data needed to meet the new Department of Health and Social Care Client Level Data Set Requirements.

Two additional dedicated Business Intelligence Officers were recruited into post in May specifically for ASC, to focus resource on developing the new Business Intelligence Dashboards that are aligned to the KPIs in the Improvement Plan.

ASC Continue to work with the BI Team to ensure that once the operational restructure is in place, the necessary data reporting can be extracted from Liquid Logic, to provide data on waiting lists and times, and to review quality and performance.
