

Bath & North East Somerset Council

MEETING:	AVON PENSION FUND INVESTMENT PANEL
MEETING DATE:	25 FEBRUARY 2026
TITLE:	Risk Management Framework Review for Periods Ending 31 December 2025
WARD:	ALL
AN OPEN PUBLIC ITEM	
List of attachments to this report: Exempt Appendix 1 – Mercer Report: Risk Management Framework Review 31 December 2025	

1. THE ISSUE

- 1.1. The Funding and Risk Management Group (FRMG) is responsible for agreeing the operational aspects relating to the Fund's Risk Management Framework (RMF) thereby ensuring that strategic objectives continue to be met.
- 1.2. Exempt Appendix 1 shows the individual risk management strategies are rated green and are performing in line with expectation. At an aggregate level the RMF is rated red due to the ongoing performance drag relative to a portfolio which manages risk through physical asset allocation alone.
- 1.3. There was a total collateral interest rate buffer of c.5.8% at 31 Dec, which is 2.8% above the point at which the manager would engage with the Fund to increase collateral. The collateral position has declined versus the prior quarter due to the recent increase to index-linked gilt exposure.
- 1.4. Consistent with Fit for the Future guidance, an independent review of the RMF is currently being undertaken by the Fund's new pool, LPPI.

2. RECOMMENDATION

The Avon Pension Fund Investment Panel:

- 2.1. **Notes the performance of each of the underlying RMF strategies and current collateral position as set out in Exempt Appendix 1.**

3. FINANCIAL IMPLICATIONS

- 2.2. The risk management strategies have been implemented to provide greater certainty that the funding plan will be achieved and therefore contribution levels will be stable and minimised. Any changes to the framework can affect the level of employer contributions in the future.

4. RISK MANAGEMENT STRATEGY PERFORMANCE

- 4.1. The underlying equity benchmark rose 3.5% over the quarter, with the equity protection strategy (EPS) detracting 0.4% from the net equity performance.

Since inception the dynamic EPS has detracted c. 2.5% from equity returns and reduced volatility by c. 24%.

- 4.2. The LDI trigger framework has now been replaced by the strategic index-linked gilt exposure which targets a hedge ratio of 50% of the interest rate sensitivity of the liabilities.
- 4.3. The average yield achieved as a result of the LDI restructure (implemented in Q425) was CPI+2.2%. The LDI manager uses leverage of c. 1.5x to achieve the c.£1.8bn desired exposure and total transaction costs incurred were c. £1.1m (c .0.03% of exposure traded).

5. RISK MANAGEMENT

- 5.1. An effective governance structure, defining clear responsibilities, and ensuring that the decision-making body has an adequate level of knowledge and access to expert advice, is a key aspect of the risk management process.

6. EQUALITIES

- 6.1. A proportionate equalities impact assessment has been carried out using corporate guidelines and no significant issues have been identified.

7. CLIMATE CHANGE

- 7.1. The Fund is implementing a digital strategy across all its operations and communications with stakeholders to reduce its internal carbon footprint in line with the Council's Climate Strategy. The Fund acknowledges the financial risk to its assets from climate change and addresses this through its strategic asset allocation to Paris Aligned Global Equities, Sustainable Equities and renewable energy opportunities. The strategy is monitored and reviewed by the Committee.

8. OTHER OPTIONS CONSIDERED

- 8.1. None

9. CONSULTATION

- 9.1. The Head of Pensions has had the opportunity to input to this report and has cleared it for publication.
