DRAFT

PART 2 –
THE COUNCIL'S DETAILED PROGRAMME FOR APPLYING ITS SHARE OF THE
PROCEEDS OF THIS SCHEME DURING THE OPENING FIVE YEAR PERIOD

It is proposed that the Scheme would commence on []. This plan therefore covers the five-year period from [] to [].

As set out in Part 1 of this Annex, it is not anticipated that the proposed Scheme would generate substantial net revenues. The Council's detailed plan for applying any net proceeds during this period would therefore depend to a large extent on:

- the level of net proceeds generated;
- the progress made towards meeting the required limit values for NO₂;
- to what extent the Scheme has impacted on the affected groups identified in the Equalities Impact Assessment for the Scheme;
- to what extent the proposed improvements have already been implemented by other means.

Given these uncertainties the Council intends to form a Revenue Reinvestment Reserve Steering Group comprised of councillors, senior officers and representatives from relevant business and other key interest groups to review and prioritise the proposed improvements and make recommendations to the Project Board for approval.

These improvements could include:

- enhancing the non-charging measures already being funded by the Government's Implementation Fund and Clean Air Fund;
- enhancing the monitoring and evaluation of the Scheme (and implementing the contingency plans if required);
- maintaining and enhancing the existing walking and cycling network and creating low traffic neighbourhoods;
- supporting walking, scooting and cycling to school initiatives and creating school streets;
- supporting and enhancing the public transport network, including home to school transport;
- maintaining and enhancing the public electric vehicle charge point network;
- supporting and enhancing sharing schemes such as the electric cycle hire scheme and car and van club network;
- providing additional park and ride capacity and security at the existing park and ride sites and on existing bus routes;
- providing schemes to reduce the impact of vehicles on the health and wellbeing of residents and visitors;
- supporting the development of a mobility as a service (MaaS) platform; and
- related research and policy development.
