

Council MRP Policy – (2024/25 Policy)

When the Authority finances capital expenditure by borrowing it creates debt, and must put aside resources to repay that debt in later years. The amount charged to the revenue budget for the repayment of debt is known as Minimum Revenue Provision (MRP), although there has been no statutory minimum since 2008. The Local Government Act 2003 requires the Authority to have regard to the Ministry of Housing, Communities and Local Government's Guidance on Minimum Revenue Provision (the MHCLG Guidance) most recently issued in 2018.

The broad aim of the MHCLG Guidance is to ensure that debt is repaid over a period that is either reasonably commensurate with that over which the capital expenditure provides benefits, or, in the case of borrowing supported by Government Revenue Support Grant, reasonably commensurate with the period implicit in the determination of that grant.

The MHCLG Guidance requires the Authority to approve an Annual MRP Statement each year, and recommends a number of options for calculating a prudent amount of MRP. The following statement incorporates options recommended in the Guidance as well as locally determined prudent methods.

- For capital expenditure incurred before 1st April 2008 MRP will be determined as the principal repayment on a 50 year annuity with an annual interest rate equal to 2% which will fully finance this element of the CFR within 50 years, incorporating an "Adjustment A" of £38.8m.
- For unsupported capital expenditure incurred after 31st March 2008, MRP will be determined by charging the expenditure over the expected useful life of the relevant asset as the principal repayment on an annuity with an annual interest rate equal to the average relevant PWLB rate for the year of expenditure, starting in the year after the asset becomes operational. MRP on purchases of freehold land will be charged over 50 years. MRP on expenditure not related to fixed assets but which has been capitalised by regulation or direction will be charged over 20 years.
- For assets acquired by finance leases or the Private Finance Initiative [and for the transferred debt from Avon County Council], MRP will be determined as being equal to the element of the rent or charge that goes to write down the balance sheet liability.
- Where former operating leases have been brought onto the balance sheet due to the adoption of the IFRS 16 Leases accounting standard, and the asset values have been adjusted for accruals, prepayments, premiums and/or incentives, then the annual MRP charges will be adjusted so that the total charge to revenue remains unaffected by the new standard.

Annex 7

- For capital expenditure loans to third parties that are repaid in annual or more frequent instalments of principal, the Council will make nil MRP unless (a) the loan is an investment for commercial purposes and no repayment was received in year or (b) an expected credit loss was recognised or increased in-year, but will instead apply the capital receipts arising from principal repayments to reduce the capital financing requirement instead. In years where there is no principal repayment, MRP will be charged in accordance with the MRP policy for the assets funded by the loan, including where appropriate, delaying MRP until the year after the assets become operational. Sufficient MRP will be charged to ensure that the outstanding capital financing requirement (CFR) on the loan is no higher than the principal amount outstanding less the expected credit loss. This option was proposed by the government in its recent MRP consultation and in the Authority's view is consistent with the current regulations.

Capital expenditure incurred during each financial year will not be subject to a MRP charge until the following financial year or until the year after the asset becomes operational.
